

1. Right click on the package you want to export. Select Export

2. The following dialog box should appear. Choose the 'Archive File' option under the 'General' category to launch the appropriate export wizard.

- Next, you will see this dialog box. Verify that the right package is checked, and that the zip option is selected. Don't forget to name the zip file and its location (middle section of the dialog). Hit the 'finish' button to create the zip file at the location you specified.
